KANSAS CITY, MISSOURI - KANSAS CITY, KANSAS

This Document Is Issued as a
Supplement to The Occupational Data Book
Prepared by The Missouri Occupational
Information Coordinating Committee

January 1982

STATISTICS ON OCCUPATIONAL SUPPLY-DEMAND

KANSAS CITY, MISSOURI - KANSAS CITY, KANSAS

This set of supply/demand analysis clusters is provided as a supplement to the statewide publication, Statistics on Occupational Supply-Demand: Missouri. Potential users of these statistics should have studied the introductory materials in the statewide publication and should use these clusters together with the analysis presented for the statewide clusters.

The statewide supply-demand report is presented along with the Kansas City SMSA and the St. Louis SMSA reports in the Occupational Data Book prepared by the MOICC. The Kansas City SMSA report includes statistics on current employment, projected employment, and average annual openings, developed by the Division of Employment Security for the Kansas City SMSA (Standard Metropolitan Statistical Area). The SMSA includes the following counties: Cass, Clay, Jackson, Platte, and Ray in Missouri; Johnson and Wyandotte in Kansas. The Kansas City SMSA report also includes program completion data for education/training programs offered in this seven county area.

The supply/demand clusters included in this report, however, are prepared for data users who are interested in examining occupational program completions from Missouri and Kansas institutions separately. This report gives the completion data for Missouri and Kansas on separate pages of the same cluster. For example, if you turn to cluster 0110, Radiologic Technology (all levels), in the Kansas City SMSA report you will find that 48 persons completed programs of study for this occupation from institutions within the SMSA. In this report when you turn to the cluster 0110 designated as "SMSA: (03) Kansas City, Missouri", (upper left corner of cluster), you will find that 41 of the 48 persons completed programs from institutions located within the Missouri portion of the SMSA. Cluster 0110 designated as "SMSA: (09) Kansas City, Kansas" shows that seven persons completed programs from institutions located in the Kansas portion of the SMSA. All clusters are in pairs so that cluster 0110 for Missouri is followed by cluster 0110 for Kansas.

There is currently no method of separating the demand data into Missouri and Kansas portions, so demand figures for the entire SMSA are repeated in the Missouri and Kansas clusters. This repetition of the same demand data is provided only as a frame of reference. When only demand data is shown in a cluster, this indicates that no completions for this occupational area were shown from institutions within the geographic area covered.

It is recommended that planners of occupational programs for the Kansas City area use the Kansas City SMSA report from the Occupational Data Book in analyzing the supply and demand for labor and that this set of clusters only be used to examine the relative supply of occupational completors from the Missouri and Kansas portions of the SMSA.

It should be noted that completion data from occupational programs offered by postsecondary private/proprietary schools located in the Kansas portion of the SMSA were not included in this report. There is currently no existing

data source to provide this information. A description of the data sources utilized may be found in Chapter IV of the Occupational Data Book.

Since all the sub-state cluster numbers are the same as the statewide clusters, the indexes for the Occupational Data Book may be utilized for ease in finding particular clusters, occupations, or programs.

If the reader has questions about data presented in this report or about appropriate uses of the data, please contact the MOICC office for assistance:
